SGNOG UPDATE

Tay Chee Yong

APRICOT 2013

What…

- An educational and operational forum for discussion and sharing of
    - Networking technologies
    - Industry best practices
- A platform to allow engineers from service providers, CDNs, etc, to exchange technical info and knowledge
- Non-profit and organization-neutral. The meetings are informal, and is run by volunteers from the Internet community.

Why…

- Lack of communications between engineers in local network operators
- Missing technical discussion platforms (mailing list, events, etc) for local network professionals to interact
- Network engineers often looked outwards (overseas conferences) or upwards (vendors) for knowledge
- What about "within"?

Past Meeting

- SGNOG-1
  - 20 July 2011
  - Half-day conference event
  - Held in a clubhouse
  - Good turn out of ~80 participants
  - Quality speakers from local ISP and global carriers, quality topics
    - IPv6 topics
    - Internet exchange updates
    - Vendor updates
  - Great success by a 2-man program committee

Moving Forward

- Revamped website
  http://www.sgnog.net
- We are on Facebook now!
  http://www.facebook.com/SGNOG
- New program committee formed
- Meeting to be held once a year
- More speakers, more interesting topics

SGNOG-2

- Next Meeting?

Date : **14 June 2013**

Venue : TBC

feedback@sgnog.net
